Timpeallacht (truailiú)

Seanfhocail

Is minic ciúin ciontach	The quiet one is often guilty.
Aithníonn ciaróg ciaróg eile	"like sees like"
Is glas iad na cnoic i bhfad uainn	The hills are green far away
Is binn béal ina thost	"It's sweet, a mouth in its silence."
Ní neart go cur le chéile	A chain is only as strong as its weakest link".
I ndiaidh a chéile a thógtar na caisleáin	Castles are built one after the other; do things one at a time.
Is fearr an tsláinte ná an táinte	Your health is better than wealth
Bíonn an fhírinne searbh	The truth can hurt.

Tús

Tír álainn shuaimhneach is ea an tír seo de ghnáth .Tá clú agus cáil uirthi ar fud an domhain mar áit shuaimhneach ,áit a bhfaighidh tú faoiseamh ó bhrú an tsaoil inti. Sin mar a gceapann turasóirí ar aon nós'Is glas iad na cnoic i bhfad' uathu is dócha mar an féidir a rá i ndáiríre gur tír álainn í Éire a thuilleadh?. Nach bhfuil sí beagnach millte anois leis an mbruscar , leis an dímheas, le truailiú?

(This country is a beautiful peaceful country usually.It has a great reputation as a place from which you can escape the pressures of life.Thats the opinion of tourists anyway .Far away hills are green I suppose as can one really say that this is a beautiful country any longer?Is it not destroyed with litter ,with disrespect,with pollution?)

Ciseal ózóin

Ní féidir a shéanadh ach go bhfuil feabhas mór tagtha ar ár gcaighdeán maireachtála le blianta beaga anuas ./Is iontach an saol atá againn -laethanta saoire ,taisteal,teicneolaíocht, fionnachta eolaíochta,siopadóireacht,carr faoinár dtóin agus mar sin de. / Tá monarchanna againn agus fostaíocht iontu .Tá teas inár dtithe -idir gáis agus ola. Éirimid ar maidin, téimid amach an doras agus go deireadh na hoíche is beag smaoineamh a dhéanaimid ar ár timpeallacht ná ar thruailliú na timpeallachta thart orainn ./Tá carr ag beagnach gach dalta ollscoile anois, úsáidimid eitleáin chun dul thar lear,tá trácht uafásach ar na bóithre agus iad go léir ag scaoileadh carbóin agus ceimiceáin amach san atmaisféar Déanann na ceimiceáin seo damáiste don sraith ózóin.Deirtear go bhfuil an tsraith ózóin ag ídiú in aghaidh na bliana. Tá aimsir an domhain ag athrú -Tá baol na hailse craicinn ann agus seo mar gheall ar Théamh Domhanda.Is ag dul in olcáis atá an scéal.Táimid ag úsáid an iomarca breoslaí iontaise-ola, peitreal,gás ,gual,agus móin.Is rí dheacair a thuiscint cén fáth nach gnó práinneach é don Rialtas .

We cannot deny the fact that our standard of living has improved greatly over the years.it is a fantastic life-holidays,travel,technology,scientific inventions,shopping,cars,etc.we have employment in factories,heat from both gas and oil in our homes.From the moment we get up in the mornings ,head out the door until nightfall we rarely think about our environment nor pollution.Almost every university student has his own car,planes are used for travelling abroad,dreadful traffic congestion and all releasing carbon into the atmosphere.This carbon damages the ozone layer .It is said that the ozone layer is being depleted yearly. The weather is changing -the danger of skin cancer is increasing and all because of global warming .Things are getting worse.We are using too many fossil fuels-oil,petrol,as,coal and turf.It is difficult to understand why the government does not see this as an urgent situation .

Truailliú

Is ceist chonspóideach í an cheist seo faoi thruailliú na timpeallachta. Tá truailliú an aeir ,na bhfarraigí agus na n-aibhneacha thart orainn ,a bhuí leis an bhforbairt teicneolaíochta.Bá cheart finéal throm a ghearradh ar mhonarchanna nach glaíonn le rialacha na dlí. Ní neart go cur le chéile agus tá orainn ár seacht ndícheall a dhéanamh chun dul i ngleic leis an bhfadhb seo .Tosaímid leis an mbruscar .Tá ár sráideanna millte le bruscar, le buidéal briste,guma coganta 's gach saghas salachair.Feictear málaí móra dubha caite ar leath thaobh toisc nach bhfuil daoine sásta íoc as an mbardas Chathrach. Rud eile a chuireann déistin orm ná an dí mheas a bhíonn ag ógánaigh ar an timpeallacht agus iad amuigh sna hoícheanta.Caitheann siad uathu na buidéal agus an bia gasta agus is ar oibríthe Chomhairle Chontae glanadh suas ina ndiaidh .Ní maith an fháilte seo do thurasóirí.

This is a controversial topic -environmental pollution.air ,sea,and rivers are polluted thanks to technological development.Factories breaking the law should be penalised.There is strength in unity and we have to do our best to tackle this problem.Lets start with litter-Our streets are destroyed with litter,broken bottles,chewing gum,every type of filth.Black bags are thrown on the side of the roads as people are unwilling to pay the Co Council fees.Something else that disgusts me is the disrespect youngsters have for our environment at night .They throw their empty bottles and fast food aside and the co council workers are left to clean up after them .This is not a great welcome for tourists

Truailliú núicléach

Nuair a luaitear 'timpeallacht' smaoinítear ar thruailliú núicléach i gcoitinne. Faraor ach is fadhb an mhór seo don chine daonna. Tá Sellafield lonnaithe ar chósta na Breataine. De réir tuairisceoirí tá an t-uisce sa Mhuir Cheilteach lofa le rad-ghníomhach. Táthar ann agus is cuma leo cén dochar nó cén marú a dhéanann siad. Is dócha go bhfuil luacha bréige acu agus gurb i an tsaint agus ró dhúil san airgead a bpríomh smaointe. Tá Rialtais ann agus iad lofa le hairgid-na billiún euro á gcaitheamh ar armlann éitheach agus ar chogaidh. Tar éis uafás Chernobyl cheapamar go raibh ceacht foghlamtha ag an domhan

ach bíonn an fhírinne searbh agus i Márta 2011 bhí tubaiste beagnach níos measa ann – Fukushima. Bhí ar 150,000 duine a dtithe a fhágáil agus ní fios i ndáiríre cén damáiste a fheicimid as seo amach. Tógfaidh sé scor bliain eile chun aon fheabhas a fheiceáil. Is cúis imní seo domsa. Tá fadhb mhór ag an Rialtas faoi láthair – cá gcuirfidís an t-uisce rad-ghníomhach?

When one mentions 'environment one thinks of nuclear pollution in general. Unfortunately this is a big problem for the human race. Sellafield is situated on the coast of Britain. It has been reported that the Irish sea has radioactivity levels. There are people who do not care about the damage they do. They have false values- greed and money are their sole priority – Governments spend billions on nuclear arms and wars. After the Chernobyl disaster we thought we had our lesson learned but truth is bitter and in March 2011 there was almost a worse disaster – Fukushima-150,000 people had to abandon their homes and we don't know yet what damage has been done. It has been reported that it will take 20 years to see any improvement. One problem the government now has – where to put the polluted water?

Ola

Aibreán 2010 tharla an tubaiste is mó ola riamh sa Mhurascaill i Mheicsiceó. Cailleadh aon duine dhéag bás agus lean an doirteadh ar feadh trí míosa. Mhill beagnach cúig milliúin batrall ola an fharraige agus is dócha gach rud beo inti. Is minic ciúin ciontach a deir an seanfhocal agus ní raibh mórán le rá ag BP go dtí seo. Tuairiscíodh le déanaí go bhfuil na billiúin euro le híoc acu

April 2010 saw the worst oil disaster in the history of oil drilling in the Gulf of Mexico. 11 people died. Oil leaked for 3 full months. Approximately 5 million barrels of oil polluted the sea and every living thing in it I suppose! The guilty are often silent and BP didn't have much to say until recently. They have billions to pay out it has been reported.

Eagraíochtaí deonacha

Buíochas le Dia tá iarrachtaí á ndéanamh ag eagraíochtaí deonacha

- Tá athchúrsáil ar siúl sa tír seo – feictear daoine ag caitheamh amach búidéal agus páipéir sna háiteanna cearta. Tá grúpaí ann go daingean i gcoinne ioisceoireanna toisc an méid ceimiceáin a thagann astú ach céard a dhéanfaimid lenár mbrúscar?
- Déanann na Glasaigh a ndícheall ár meon aigne a athrú agus tugann Greenpeace eolais dúinn faoi ábhair timpeallachta.

- Tá eolaithe ag déanamh taighde ar mhodhanna taistil nach ndéanfadh damáiste don atmaisféar. Tá an carr leictreach ar fail anois agus cadhnaí ann in ionad peitiril. Is féidir é a athluchtú in áiteanna speisialta scaipthe ar fud na cathrach.
- Tá postanna nua i bhFuinneamh Glas. Is féidir céimeanna ollscoile a bhaint amach anois i bhFuinneamh In-Athnuaite-(fuinneamh gaoithe, fuinneamh gréine,
- Oileán is ea Éire agus ba cheart dúinn úsáid a bhaint as fuinneamh hidroleictreach, fuinneamh taoide agus fuinneamh toinne.
- Tá bac ar an saghas guail a usáidimid

Thankfully efforts are being made by voluntary organizations

- Recycling –people can be seen sorting their bottles and paper
- The Greens do their best to change our attitudes and Greenpeace give us info about the environment
- Scientists research new modes of transport that do not damage the environment-we now have the Electric car with batteries instead of petrol.They can be recharged in special locations throughout the cities.
- New jobs are available in Green Energy –University degrees are awarded in renewable energy –wind energy, solar energy,
- Ireland is an island and we should using hydro electric energy, tidal and wave energy
- There is a ban on they type of fuel we use

Críoch

Bhfuilimid ag tógáil aire dár bpláinéad –níl a chosúlacht ar an scéal go bhfuil. Is léir do ghadhair an bhaile go bhfuil géarchéim againn agus tá imní orm –tá muintir na tíre seo chomh buartha sin faoi fhadhanna eile faoi láthair, nach bhfuil an claonadh iontu troid in aghaidh an truaillithe. Is cosúil go bhfuil an Rialtas ag ligean na maidí le sruth. Caithfimid seasamh le chéile agus aire a thabhairt d’ár dtimpeallacht. Dá luaithe é is fearr é

Are we taking care of our planet-it seems not. Everyone knows that we have a crisis and I am worried.-people of this country are so preoccupied with other problems at the moment that they have no inclination to battle against pollution. The Government is leaving things be. We must stand together and take care of our planet –the sooner the better.
